

Help Your Child with Maths at Home

Opportunities to Experience Money

- Give your child pocket money each week and get them to record what they have spent it on each day, keeping a running total.
- Look in a toy catalogue and ask them to choose Christmas presents that they would like to receive. Get them to record and add up how much money it would cost.
- Plan a meal/baking and make a list of ingredients you will need. Go shopping for them and then look at the till receipt together to see how much each item cost and how much the meal/baking came to altogether.
